

Motorcycle transport checklist

ACCESS

Access must be available for both the transport vehicle and ramps used for loading/unloading purposes. We would advise letting your neighbours at both collection and delivery addresses know of your move date if our vehicles are going to cause them any inconvenience

STEERING

Fittings will need to be taken down ready to be packed and moved by the crew. If you'd like our handyman to assist with doing this please let us know.

KEYS / PAPERWORK

If you have chosen to do your own packing it is important to use the appropriate containers for different items.
